To Whom It May Concern,

Ankur Dave was one of our Software Development Engineer interns this summer and in this role successfully completed all tasks assigned to him, including designing and developing new UI components in Flex and ActionScript for our web-based learning product.

Ankur far exceeded our expectations, regularly demonstrating depths of understanding and coding skills sometimes lacking even in college graduates. He worked well with all members of the team and has made a significant contribution to our development effort. He will be greatly missed.

We highly recommend Ankur and would eagerly hire him again.

Sincerely,

  
Daniel Kerns,  
VP Engineering

  
Nigel Green  
Senior Software Engineer
